**Un'indagine approfondita
sull'estetica dei cementi ha dato
origine alla collezione Rasp.**

The creation of Rasp collection was
inspired by a thorough analysis on the
aesthetics of cement.

Dal forte carattere materico, la superficie presenta parti brillanti intervallate a zone opache che rimandano al processo di essiccazione della materia.

The strong impact of its soft and contemporary surface is composed by alternated shiny and matt sections which recall the hydration process of concrete.
