CHROMIE

Chromie es color en todo su esplendor. La colección está inspirada en el círculo cromático, en la clasificación y entendimiento de la teoría del color.

El círculo cromático está dividido en colores primarios, cian, magenta y amarillo. La combinación entre ellos dan lugar a los colores secundarios como el verde, púrpura y naranja. Las mezclas finales de colores primarios y secundarios dan vida a los colores terciarios.

Una amplia gama de 28 colores emerge en Chromie, que transmiten concordancia y compatibilidad entre colores fríos y cálidos, combinándose entre sí y creando una infinidad de armonías y mezclas posibles.

Chromie means color in all its splendor. The collection is inspired by the chromatic circle, within the classification and understanding of color theory.

This chromatic circle contains primary colors Cyan, Magenta and Yellow. The combinations between these lead to the creation of the secondary colors such as Green, Purple and Orange. Final blends of primary and secondary colors bring the tertiary colors to life.

A wide range of 28 colors emerges inside of Chromie, transmitting concordance and compatibility among cold and warm colors, combining with each other, to create an infinity of harmonies and blends.
