**IT** Essenzialità, neutralità e **matericità** sono le chiavi interpretative che hanno guidato la realizzazione di **Glocal**, la nuova collezione di **cemento rasato in gres porcellanato Mirage**. Tutta la storia dell'architettura moderna e contemporanea, dalle origini della corrente brutalista di Le Corbusier alle casseforme giapponesi di Tadao Ando, ha infatti visto il **cemento come uno dei materiali più utilizzati all'interno del panorama del design**, poiché permette ad ogni progettista di configurare e di personalizzare gli spazi seguendo specifiche esigenze stilistiche e arredative.

La forza del cemento sta nella **neutralità**, nell'**ecletticità arredativa** e nella capacità di poter racchiudere tutta l'identità materica del prodotto ceramico al fine di trasformarlo in un **vero contenitore capace di valorizzare tutti i tipi di finiture e di elementi d'arredo**. Mirage ha perfezionato questa caratteristica tipica del cemento spatalato, proponendo una collezione che si esprime in modo delicato e leggero attraverso texture pulite, che richiamano l'**anima del cemento nella sua veste più tipicamente originale**, senza trascurare una selezionata ricerca di **sottili dettagli**.

**GB** Essential, neutral and tactile are the interpretative features that have been shaped into **Glocal**, the new **smooth concrete collection in Mirage porcelain stoneware**. In the history of modern and contemporary architecture, from the origins of Le Corbusier's brutalist current to Tadao Ando's Japanese formwork, **concrete has been one of the most widely used materials in the design scene**, as it allows every designer to configure and **customise spaces following specific style and interior design needs**.

The power of concrete lies in its **neutralità**, its **eclectic decorating style** and its ability to embody all the tactile identity of ceramics, transforming them into an **authentic container able to enhance all types of finishes and furnishing elements**. Mirage has perfected this typical characteristic of spattled concrete, coming up with a collection that delicately and lightly expresses clean textures, recalling the **most typically original soul of concrete**, without neglecting a selected research into **subtle details**.

**FR** Essentialité, neutralité et **méthodologie** sont les concepts qui ont présidé à la réalisation de **Glocal**, la nouvelle collection de **béton lissé en grès cérame Mirage**. Toute l'histoire de l'architecture moderne et contemporaine, des origines du courant brutaliste de Le Corbusier aux coffrages japonais de Tadao Ando, a considéré le ciment comme l'un des matériaux les plus utilisés dans l'univers du design, car il permet à tout concepteur d'élaborer et de **personnaliser les espaces en se conformant aux exigences spécifiques relatives au style ou à l'aménagement**. La force du béton tient à sa neutralité, son **adaptabilité décorative** et sa capacité à pouvoir rassembler toute l'identité du matériau céramique pour le transformer en un véritable réceptacle mettant en valeur tous les types de finition et d'éléments d'aménagement. Mirage a perfectionné cette propriété caractéristique du béton spatalé, proposant une collection qui s'exprime de manière délicate et légère à travers des textures propres, évoquant l'**âme du béton dans sa quintessence**, sans négliger la recherche minutieuse de **détails subtils**.

**DE** Schlichtheit, Neutralität und **Materialcharakter** sind die Schlüssel zur Interpretation der Kollektion Glocal, der neuen Kollektion von **Mirage**, die das Erscheinungsbild des geschliffenen Zementestrichs jetzt aus Feinsteinzeug ganz neu interpretiert. Im Laufe der Geschichte der modernen und zeitgenössischen Architektur, von den Ursprüngen des Brutalismus von Le Corbusier bis zu den Schalungen des japanischen Architekten Tadao Ando, haben sich **Zement- und Betonböden zu einem der am häufigsten verwendeten Gestaltungsmaterialien entwickelt**. Denn dieses Material lässt dem Planer alle Freiheit, den Raum ganz nach den stilistischen Vorlieben und Einrichtungsbedürfnisse zu konfigurieren und anzupassen.

Die besondere Stärke von Beton und Zement sind der der **neutrale Charakter** und die ausgesprochene **Vielseitigkeit beim Einrichten**. Das Material vereint die positiven Materialeigenschaften von Keramikmaterial, eignet sich für ganz unterschiedliche Oberflächenausführungen und bringt **Einrichtungselemente hervorragend zur Geltung**. Mirage hat diese typische Eigenschaft von Zementspachtelboden perfektioniert und eine Kollektion geschaffen, die diskrete und schlische, aber gleichzeitig klare Texturen aufweist, die das ursprüngliche Erscheinungsbild von Zement zeigen, ohne dabei aber subtile Oberflächendetails zu vernachlässigen.

**ES** Esencialidad, neutralidad y **matericidad** son las claves interpretativas que guiaron la realización de **Glocal**, la nueva colección de **cemento rasado de gres porcelánico Mirage**.

Toda la historia de la arquitectura moderna y contemporánea, desde los orígenes del brutalismo de Le Corbusier a los encofrados japoneses de Tadao Ando, ha encontrado en el **cemento uno de los materiales más utilizados en el mundo del diseño**, ya que permite a todos los diseñadores configurar y personalizar los espacios, respondiendo a específicas necesidades estilísticas y decorativas.

La fuerza del cemento está en la **neutralidad**, en la **eclecticitad decorativa** y en la capacidad de poder encerrar toda la identidad matérica del producto cerámico con el fin de transformarlo en un auténtico contenedor que pueda valorizar todos los acabados y elementos de decoración. Mirage ha valorizado esta característica típica del cemento espatulado, proponiendo una colección que se expresa de manera delicada y ligera a través de texturas netas pero profundas, que evocan el **alma del cemento en su representación más original**, sin obviar una búsqueda seleccionada de los más **mínimos detalles**.

**RU** Простота выражения, нейтральность и фактурность – вот ключевые интерпретативные понятия, которые легли в основу создания **Glocal**, новой коллекции плитки **Mirage** из керамогранита с эффектом шлифованного цемента. Во всей истории модернистской и современной архитектуры, от истоков брутальной архитектуры Ле Корбюзье до конструкций в виде опалубки японца Тадао Андо, **цемент всегда был наиболее используемым материалом в дизайне**, поскольку он позволяет любому проектировщику конфигурировать и **персонализировать пространство, следуя определенным стилистическим и дизайнерским требованиям**.

Сила выразительности эффекта цемента заключается в его **нейтральности, дизайнера эклектичности** и способности проявить фактуру керамогранита, чтобы превратить его в **обрамление, способное подчеркнуть достоинства любого типа отделки или элементов обстановки**. Компании Mirage удалось поставить акцент на этой характеристике, присущей шлифованному цементу, предложив коллекцию, созданную в легкой и тонкой манере простую, но глубокую фактуру, выражющую **истинный дух материала в его наиболее оригинальном облике**, не забывая и о **щадительной проработке деталей**.

### FLOOR

20 MM DECORS EVO\_2/E™

#### BOULE (FREDDO / COLD)

GC 03 ST

800x800 / 31½" x 31½" x ¾"

#### BOULE (CALDO / WARM)

GC 03 ST

800x800 / 31½" x 31½" x ¾"

Il decoro BOULE è realizzato con trame fatte a mano, che riprendono alcuni elementi della natura: semi, gocce, tronchi di legno. Sono due le varianti colore, freddo con i toni del blu e caldo con tonalità ramate. Consigliamo una posa random, ad effetto "seminato". In ambienti piccoli è armonioso posato anche a tappeto o a scacchiera. La posa abbinata deve essere associata al colore del fondo: GC 03 ST.

BOULE decoration was conceived with different features. It is made with hand-made textures, which reflect various elements of nature: seeds, drops, wooden trunks. There are two color variants, cold with blue tones and warm with copper tones. We recommend a random installation, with a "seeded" effect. In small rooms it is harmonious also laid on a carpet or checkerboard. It is recommended to combine the installation with the background color GC 03 ST.

#### SUN

GC 02 ST

800x800 / 31½" x 31½" x ¾"

6 grafiche

6 graphics

SUN è un decoro composto da 6 grafiche differenti, e nasce dall'ispirazione delle forme petali dei fiori e del sole. Tratti morbidi realizzati manualmente per conferire un effetto nature. La campitura del colore non è a totale copertura, fondendosi armoniosamente con il fondo stesso. La posa è random: le 6 grafiche sono state realizzate per abbracciarsi casualmente, creando tappeti davvero unici.

SUN decoration is composed of 6 different graphics, and comes from the inspiration of the petals of the flowers and the sun. Soft strokes made manually to give a natural effect. The background of the color is not totally covering, blending harmoniously with the background itself. The laying is random: the 6 graphics have been designed to hug each other casually, creating truly unique effects.

#### WRITER

GC 03 ST

800x800 / 31½" x 31½" x ¾"

- BEST IS YET TO COME

Per tutti i grandi formati è possibile prevedere, su richiesta e con un lotto minimo, l'applicazione di una stuoia in fibra di vetro.

For big sizes, a fibreglass mat can be applied on request, with a minimum production batch.

Per garantire elevati standard di sicurezza e le migliori performance tecniche in relazione al loro utilizzo finale (piani cucina, top, arredi), tutte le lastre in formato 1620x3240 in spessore 12mm prevedono l'applicazione di una stuoia in fibra di vetro sul retro della lastra.

All the 1620x3240 slabs in 12mm thickness are provided with a fiberglass mat applied to the back of the slab, to guarantee substantial safety standards and suitable technical performance required for their final use (kitchen countertops, tops, furnishings).

## BIG SIZES

### 6 MM

**Mirage® raccomanda l'utilizzo a pavimento di lastre in spessore 6 mm per le sole applicazioni in ambito residenziale, commerciale a traffico leggero e comunque in contesti ove non vi sia passaggio di carichi puntuali pesanti o transito di carrelli a ruote dure.**

Le lastre a 6mm, grazie al loro spessore ridotto, sono particolarmente indicate per la posa su pavimenti o rivestimenti preesistenti in marmo, pietra naturale, ceramica, senza la necessità di demolire la pavimentazione sottostante. Tale pavimentazione preesistente dovrà però essere planare, stabile, rigida e priva di rotture. In tutti questi casi sarà necessario valutare attentamente, assieme al progettista della pavimentazione, l'idoneità del sottobordo. In caso di dubbio sarà necessario valutare la necessità della demolizione e/o l'utilizzo di spessori tradizionali

La posa a pavimento su massetto di lastre in 6mm è invece fortemente condizionata dall'esecuzione ottimale dello stesso, dalla sua completa stagionatura, dal rispetto degli opportuni giunti di dilatazione nonché dalla posa a regola d'arte. Pertanto, in questi casi, per maggiore precauzione, Mirage® suggerisce l'utilizzo del gres porcellanato in spessore tradizionale.

In generale, per l'applicazione a pavimento delle lastre in spessore 6mm, l'adesivo (da scegliere insieme al progettista in base alle caratteristiche del cantiere) dovrà essere applicato secondo il metodo della doppia spalmatura, al fine di assicurare la perfetta distribuzione dello stesso e di garantire un'adesione ottimale, evitando la formazione di eventuali vuoti che potrebbero essere causa di rotture.

## ACCORGIMENTI SPECIFICI PER L'APPLICAZIONE DELLE GRANDI LASTRE IN 6 MM DI SPESORE.

PRECAUTIONS FOR 6MM BIG SLABS APPLICATIONS.

SPEZIFISCHE HINWEISE FÜR DIE VERLEGUNG VON 6 MM STARKEN PLATTEN ALS BODENBELAG.

PRÉCAUTIONS NÉCESSAIRES POUR L'APPLICATION AU SOL DE PLAQUES DE 6 MM D'ÉPAISSEUR.

PROCEDIMIENTOS ESPECÍFICOS PARA LA APlicACIÓN COMO PAVIMENTO DE PLACAS DE 6 MM DE ESPESOR.

DE Mirage® empfiehlt die Verwendung von Platten mit Stärke 6 mm als Bodenbelag nur für Anwendungen im Privatbereich und in Gewerbe- und Objektbereichen mit geringer Trittbelaustung, oder in Bereichen, in denen zumindest keine Rollwagen mit harten Rädern zum Einsatz kommen oder schwere punktuelle Belastungen auftreten.

Die 6 mm starken Platten eignen sich aufgrund ihrer geringen Stärke besonders für die Verlegung auf bestehenden Bodenbelägen oder Wandverkleidungen aus Marmor, Naturstein, Keramik, ohne dass der darunterliegende Belag zuvor entfernt werden muss. Dieser bereits vorhandene Boden muss jedoch eben, stabil, hart und bruchsicher sein. In all diesen Fällen muss die Eignung des Untergrundes gemeinsam mit dem Architekten oder Planer zuvor sorgfältig geprüft werden. Im Zweifelsfall muss die Notwendigkeit einer Entfernung des bestehenden Bodenbelags und/oder die Verwendung herkömmlicher Stärken in Erwägung gezogen werden.

Die Verlegung von 6 mm starken Platten auf Estrich hängt besonders von der optimalen Ausführung des Estrichs selbst, von seiner vollständigen Reifung, der Beachtung der entsprechenden Ausdehnungsfugen sowie der nach den Regeln der Kunst ausgeführten Verlegung ab. Daher empfiehlt Mirage® in diesen Fällen die Verwendung von Feinsteinzeug mit herkömmlicher Stärke.

Im Allgemeinen muss bei der Verlegung von 6 mm starken Platten als Bodenbelag der Klebstoff (der zusammen mit dem Planer nach den Eigenschaften des Verwendungsorts ausgewählt wird) doppelt aufgetragen werden (sowohl auf dem Untergrund als auch auf der Rückseite der Platte), um eine perfekte Verteilung und eine optimale Haftung zu gewährleisten und die Bildung von Hohlräumen zu vermeiden, die zu Bruch führen könnten.

ES Mirage® recomienda la utilización como pavimento de las placas de 6 mm de espesor solo para aplicaciones en ámbito residencial, en ambientes comerciales con tránsito reducido y, en cualquier caso, en contextos sin el paso de cargas pesadas localizadas o tránsito de carretillas con ruedas duras.

Gracias a su reducido espesor, las placas de 6 mm están especialmente indicadas para la colocación sobre pavimentos o revestimientos preexistentes de mármol, piedra natural o cerámica, sin necesidad de demoler la pavimentación sobre la que se apoya. La pavimentación preexistente deberá ser, de cualquier modo, plana, estable, rigida y sin roturas. En todos estos casos, deberá analizarse attentamente, junto con el proyectista de la pavimentación, si la base es adecuada. En caso de dudas, habrá que considerar si es necesaria la demolición y/o la utilización de espesores tradicionales.

La colocación como pavimento sobre solera de las placas de 6 mm dependerá en gran medida de la óptima ejecución de la misma, de su completo curado, de que se respeten las juntas de dilatación necesarias, así como de una colocación adecuada. Para mayor precaución en estos casos, Mirage® sugiere la utilización del gres porcelánico de espesor tradicional.

En general, para la aplicación como pavimento de las placas de 6 mm espesor, el adhesivo (a elegir junto con el proyectista según las características del lugar de la obra) deberá utilizarse con la técnica del doble encollado, con el fin de garantizar la distribución perfecta del mismo y una óptima adherencia, evitando que se formen posibles vacíos que pudieran ocasionar roturas.
