

Summary of ID+C and BD+C LEED Credits

Regional Manufacturing

LEED NC v2.2 - MR 5.1, 5.2
LEED Environmental

Indoor Environmental Quality (EQ)

LEED NC v2.2 - EQ 4.2
LEED V4 Low Emitting Materials

Recycled Content

LEED NC v2.2 - MR 4.1, 4.2

Environmental Characteristics

- Do not contain highly toxic compounds & promote good indoor air quality
- No CFCs, HCFCs or other ozone depleting substances
- Production does not result in highly toxic by-products
- Contains 20% post-consumer recycled content
- 100% Recyclable
- VOC Free (both paints and aluminum)
- Single skin aluminum
- Non-Combustible
- Class A Fire Rating

Low Maintenance Requirements

- Meets AAMA 2605 Specification Standards
- Little to no maintenance required
- Durable material for interior or exterior applications
- Up to a 60-year lifecycle on exterior applications
- Long lifespan eliminates environmental impact of repeated painting and recoating
- Lower life-cycle costs
- Resists UV degradation and corrosion
- Resists chemical exposure

Global Sustainability

- Extensive network of peers to deliver products at the local level
- Ability to work with local manufacturing facilities and/or fabrication plants to form materials locally
- Ability to work with local installers
- Minimum transportation of materials needed from purchase to fabricator or job site

PURE+FREEFORM

Material Guarantee | Red List Report

Date: 3/13/2019

To whom it may concern,

This document certifies that Pure + FreeForm products including Lumiflon do not intentionally contain Red List chemicals, which are subject to current regulation.

Subject product: Pure + FreeForm Aluminum Flat Sheets and Custom Paints

No.	Subject environmentally hazardous substances	Contained Amount
1	Living Building Challenge 3.1 Red List May 2017	Not contained (0%)

Sincerely,
Will Pilkington
Operations Director
