OWNED

Leader in the sector of production and application of products for resin coverings and floors, for over twenty years Rezina® has been committed to the research and development of innovative solutions .

Added to the attention to the quality of the materials that distinguishes Rezina® is a new sensitivity to the theme of environmental sustainability, creating products capable of combining the use of eco-compatible preparations with the pleasure of aesthetic value.

For Rezina® , producing, researching and using eco-sustainable products is an essential mission . It is to support this need that Rezina Atelier was born , a new container in which to bring together all those energies and resources to design, create and distribute design solutions that are eco-compatible.

Eco-surface is the first result of this intuition, made in rolls and obtained from compounds of vegetable oils and natural mineral components. With a resilient soul, capable of resisting time, Eco-superficie is made without the addition of toxic additives.

Within this vision, GIALLO FANTASTICO was born , the first pattern that faithfully reproduces the one designed by GIO PONTI for the creation of the floor of the Pirelli skyscraper. The know-how of a production signed by Rezina ® uses new materials for a conscious reinterpretation that highlights the intuition of a great innovator. The new, natural products evoke the experimentation of the Milanese architect and designer , and come together in a work in which technology, architecture and design complement each other.

Substrate -

Reziflex Confort: Medium to light traffic, residential use, cushioned, 4mm thickness, 50% recycled material, vegetable based substrate.

Rezina Regular: High traffic, commercial use, 3mm thickness, heat jointed, 50% recycled material, PVC based substrate.

Installation - Glue

Size of roll, nominal - 2m X 20m (6.56ft x 65.65ft), 2m X 25m (6.56ft x 82ft)

- Minimum per order - 550 SQ/FT
- Totally recyclable rolls, obtained 50% from noble materials and recycled compounds for the remaining 50%. With a resilient soul, able to resist time, it is made without the addition of toxic additives, also suitable for children.
- Color may vary per substrate
- Print customization available with orders greater than 2,500 SQ/FT
- NO exterior installation or direct wet area installation
