ITALIAN TILES DESIGN

E adesso la mia vita fugge in dia-
gonale, | ritorna prepotentemente
un desiderio morale, | la mia vita
cerca fughe in diagonale | per
accelerare le calde influenze del
sole.

[Franco Battiato, Running against
the grain]

And now my life runs diagonally, | a
moral desire forcefully returns, | my
life seeks diagonal escapes | to ac-
celerate the warm influences of the
sun.

[Franco Battiato, Running against the
grain]

SLASH

Slash è un nuovo concetto di rivestimento murale. Nasce dalla voglia di creare soluzioni decorative con un modulo guida montato in molteplici soluzioni diverse tra di loro. Le qualità estetiche e materiche, esaltate di volta in volta dalle molteplici composizioni possibili, lo rendono un prodotto eccellente per un impiego in ambienti di pregio, sia in spazi pubblici che domestici, tanto interni quanto esterni.

Da un elemento standard di 10x55,3 cm è scaturito un design che, appropriandosi del segno “ / ”, ha scomposto il modulo lineare e bidimensionale in quattro trapezi arricchiti della terza dimensione e differenti textures.

Il modulo di progetto, può essere realizzato miscelando anche più colori, aumentando così le possibilità compositive. Un ulteriore personalizzazione è data anche dal fugante, che potrà essere scelto in base al proprio gusto. L'insieme di tutti questi elementi combinati lo rendono un prodotto molto versatile in linea con il design internazionale contemporaneo.

Slash is a new concept of wall covering. It comes from the desire to create decorative solutions through a guide rail available in multiple different versions. The aesthetic and material qualities, enhanced by the multiple compositions, make it an excellent product for prestigious environments, domestic spaces, public places, both indoor and outdoor.

Starting from a 3,9x21,77 inch standard element, a design emerges which, through the appropriation of the “ / ” sign, split the linear and two-dimensional module into four trapezoids enhanced by a third dimension and different textures.

The project module can be even realized by mixing tiles of different colors, thus increasing the compositional possibilities. A further customization is also provided thanks to the grout, which can be chosen according to your own taste.

All these elements make it a very versatile product in line with international contemporary design.
