LIFETILE

This little dish is the perfect accompaniment to fish or meat. It gets particularly well with white, white fish such as trout or with a simple potato soup. (Also it works well. The quantity of fish you eat is entirely personal.)

For each person

250g washed young spinach, large stalks removed
Extra virgin olive oil
Pinch of finely chopped garlic

Italian cherry (cervino in Italian) is very different from the kind you see in our and so easy to get in supermarkets. It's more plum-like and has long, winged green fruit that resemble large, plump, diamond leaves. It makes me think when I walk round the markets of Venice, Treviso, Padova and Verona – and my back to Lando's my handbag is often a brown bag of green cherries.

If you see 'bud cervino', that another green cherry with an even lighter cooked green vegetable or raw intake.

Vicentina Cenere offers strength, lightness, flexibility and ductility

COLLECTION

MARMO APUANO

One of the most representative varieties of quarry materials. The veining multiply from the deep white of the background, creating different depths and contaminating the purity of the marble.

Una delle varietà più rappresentative tra i materiali di cava. Dal bianco del fondo si sprigionano le venature che con diverse profondità vanno a contaminare il candore del marmo.
